

Multiwall Standing Seam System

Sustainable Glazing and Roofing Elements

Backed by 35 years of product development experience, this standing seam panel system integrates the high-performance characteristics of the multiwall polycarbonate sheet with top quality components, giving architects and builders the flexibility to design creative yet sustainable glazing and roofing elements.

The unique properties of this polycarbonate multiwall standing seam panel system provide superior rigidity, excellent thermal insulation, and long-term weatherability, ensuring maximum strength and complete sealing. More natural light can be brought into a building without added structural complexity or loss of insulation.

Features & Benefits

- Flexible & Easy to Install
- Purlin Based Installation
- Minimum 5% Slope
- Resistant to Wind & Snow Load
- Watertight Leak Proof System

Topgal Standing Seam System

Residential • Commercial • Architectural

Perfect for many applications, multiwall standing seam provides high-quality daylight and is resistant to the forces of nature and weather!

Call Easy Building Products today to get started on your next project!

Standing Seam System

A standing seam is a type of connection between two multiwall polycarbonate panels. The edges of adjacent polycarbonate standing seam roof panels are turned up and then interlocked with easy-to-fit connectors, ensuring the standing seam roof will be watertight and strong. Standing seam roofing systems minimize air or water leakage, reducing the need for gaskets or sealants.

The construction of the Topgal standing seam panel system provides high-quality diffused daylight, increases impact protection, offers solar heat control, and eliminates thermal expansion issues. When designed and installed correctly, Topgal polycarbonate coverings are highly resistant to the forces of nature and weather.

Product Specifications

Stock Colours:	Clear, Bronze, Ice, and Blue*
Panel Widths:	8mm - 23.6" (600mm) 20mm - 39.29" (998 mm)
Sheet Length:	Maximum Length 39'
Sheet Thickness:	8mm, 20mm*
UV Protectant:	1 Sided
Warranty:	10-Year Limited Warranty

** TOPGAL panels are available in standard colours as well as special colour layers that selectively reflect solar radiation. Sheets are available in 10mm or 16mm thicknesses - special order only.*

TOPGAL Polycarbonate Roofing System Includes:

- Topgal Polycarbonate Standing Seam Panels
- PC or AI Connectors
- Connector End Caps
- PC or AI Side Profiles
- AI Edge Profiles
- Fasteners (Panels & Wood or Metal Structures)
- Anti-Dust Tape
