

BLACK FLAT HEAD SCREW™

Perfect for:

- ✓ Deck frames
- ✓ Trellis framing
- ✓ Ledger boards
- ✓ Joists
- ✓ Post supports
- ✓ Play-set structures
- ✓ Retaining walls
- ✓ Laminated beams
- ✓ SIP panels
- ✓ Pole barns

Our Black Flat Head Screw™, the epitome of versatility and style in fastening solutions. Crafted to meet a full range of construction projects, it perfectly complements various applications with its sleek black finish and flat head design.

KEY FEATURES & UNIQUE TECHNOLOGIES

Flat Head with Talon Grip™

The unique flathead design with Talon Grip™ ensures increased pull-through resistance and a clean, polished look when drilled into materials.

Tight Star Recess System

The Tight Star Recess system provides an excellent fit, wobble-free experience, optimal force transmission, and compatibility with regular star drive bits.

Innovative Tapper Point

The Innovative Tapper Point is specially designed for wood connections, featuring a corkscrew-like start and blade-cutting threads for easy piercing and reduced strain during installation.

Cutting-Edge Coating

A CR3-free base coat finished with our proprietary black nano-coating ensures ultimate protection against corrosion, wear, and friction.

AVAILABLE SIZES

- ▶ #12, #25/64
- ▶ Lengths ranging from 3-3/8 inches to 9 inches

MATERIAL COMPOSITION

Crafted from case-hardened carbon steel using exclusive U2 Fasteners technology.
